PROFESSIONAL SUMMARY

DevOps Engineer with nearly three years of experience building and operating enterprise cloud infrastructure for German technology companies — Azure and AWS, Infrastructure as Code (Terraform, Bicep), Kubernetes/Helm, and multi-stage CI/CD on Azure DevOps — for clients in financial trading, energy, transportation, and certification. Microsoft Certified: Azure Solutions Architect Expert and Azure Administrator Associate.

EXPERIENCE

DevOps Engineer — P3 Group, Germany

January 2026 – Present

- Design a multi-stage Docker build strategy for a Java 21 Spring Boot multi-module Maven application at a German exchange-traded securities trading firm, packaged as Helm charts for independent microservice deployments on Azure Kubernetes Service (AKS).
- Architect inbound and outbound network traffic flows and client IP whitelisting, securing access to real-time market price-feed data streaming.
- Build and maintain modular Azure Bicep infrastructure and Terraform-based IaC for a global testing, inspection & certification company, automating multi-stage CI/CD on Azure DevOps with reusable pipeline templates across multiple environments.
- Owned cloud architecture for a major Berlin-based energy utility, sustaining 100% service continuity through the organisational transition and driving operational improvements via targeted architecture reviews.

Cloud Engineer — ConStraight - Die CloudExperten, Germany

April 2025 – January 2026

- Led a Terraform team automating Azure infrastructure provisioning for a major Berlin-based energy utility, establishing reusable modules and standardised deployment pipelines to improve reliability and reduce manual effort.
- Provisioned and managed Azure infrastructure including AKS clusters, Virtual Machines, Storage Accounts, Azure Files, Key Vault, and Azure Data Lake, ensuring secure and compliant cloud operations.
- Executed production change requests (disk operations, vertical scaling) and resolved infrastructure incidents within agreed service levels, maintaining service continuity.

Solutions Architect — ConStraight - Die CloudExperten, Germany

September 2024 – April 2025

- Designed and delivered a zero-downtime DNS migration from on-premises infrastructure to AWS for a leading European railway operator (EC2, NAT Gateway, BGP, Route 53), authoring the HLD/LLD blueprints used for implementation and stakeholder sign-off.
- Automated end-to-end infrastructure deployment for enterprise customers using Terraform and Azure DevOps, ensuring reliability, scalability, and compliance.
- Collaborated cross-functionally with engineering and business stakeholders to embed security, availability, and automation best practices across Azure and AWS environments.

Information Technology Consultant — ConStraight - Die CloudExperten, Germany

June 2024 – September 2024

- Delivered Microsoft Intune, Windows 365 Cloud PC, Azure Active Directory, and Entra ID services for enterprise end users, managing device enrolment, identity management, and conditional access policies.

Full-Stack Web Developer — Univenn, Izmir, Turkey

July 2023 – December 2023

- Built and shipped 3+ full-stack applications with Node.js and React, collaborating with front-end and back-end teams in an Agile environment to optimise data flow and reduce latency.

SKILLS

Cloud & Infrastructure: Microsoft Azure, AWS, Azure Bicep, Terraform (IaC), Docker, Kubernetes (AKS), Helm, Linux

DevOps & CI/CD: Azure DevOps, GitHub Actions, Git, CI/CD Pipelines, Release Management

Development: Python, JavaScript, Node.js

Professional: Agile, Scrum, Stakeholder Management, Cross-functional Collaboration, HLD/LLD Documentation

Monitoring & Observability: Grafana, Prometheus, Azure Monitor (Log Analytics), Application Insights

EDUCATION

Bachelor of Science in Software Engineering — Yasar University, Izmir, Turkey

August 2021 – July 2024

- Graduation project (HearingMate): designed a dual-backend cloud architecture serving an AI engine over a secure, scalable API; implemented a supervised-learning voice recognition model detecting distress signals with real-time alerts for hearing-impaired users.
- Key modules: Computer Architecture, Software Architecture.

PROJECTS

- Multi-node Kubernetes cluster — built with Kubeadm across three Ubuntu VMs for a highly available home-lab environment.
- AWS infrastructure as code — VPC, Subnets, EC2, RDS, and S3 provisioned end-to-end with Terraform, with IAM policies automating access control.
- Azure pipeline automation — Terraform provisioning of VNets, VMs, and Storage via Azure DevOps pipelines, secured with RBAC and policy-based access controls.

CERTIFICATIONS

- Microsoft Certified: Azure Solutions Architect Expert — January 2026
- Microsoft Certified: Azure Administrator Associate — August 2025
- Introduction to Kubernetes (LFS158), The Linux Foundation — June 2025
- Microsoft Certified: Azure Fundamentals — August 2024
